EPS & Sales

Die Wall Street startete gestern mit deutlichen Kursaufschlägen in den Handelstag. Grund hierfür waren vermutlich die Verbraucherpreis-Indices, die vor dem regulären Handel veröffentlicht wurden und die der Markt entsprechend honoriert hat. Die Tageshöchstkurse konnten zwar nicht gehalten werden, aber 5 der 6 Indices schlossen mit leichten bis kräftigen Tagesgewinnen. Erneut markierten SPX, NDQ und NDX neue ATH's. Der DJIA konnte sich am Ende des Tages nicht mehr über der Null-Linie halten und schloss kurz darunter.

Der Handelsumsatz war an der Nasdaq und an der NYSE höher gegenüber dem Vortag.

Das Verhältnis von Aktien mit neuem Hoch zu Aktien mit neuem Tief beträgt 7,2 zu 1 (Quelle: [finviz.com](https://finviz.com)).

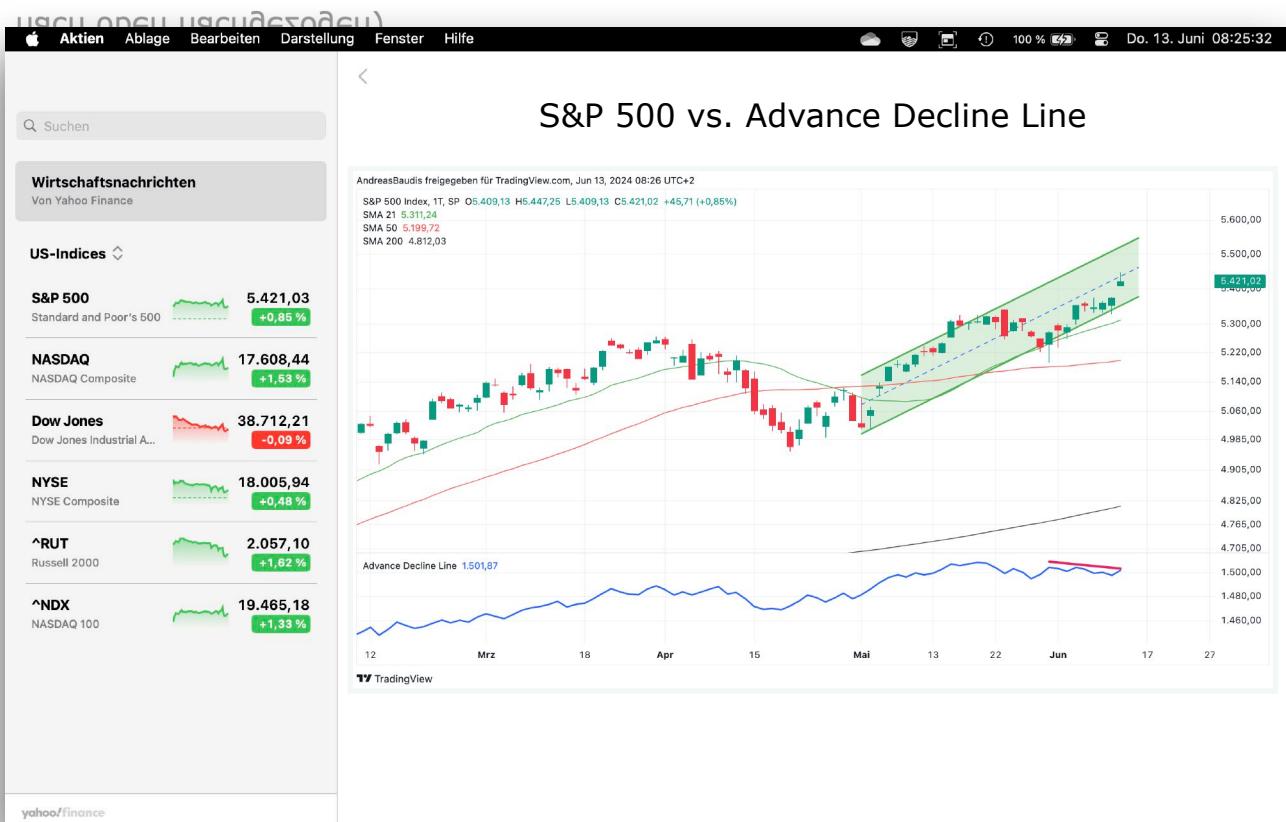

Die FED hat wie erwartet keine Zinssenkung vorgenommen und die Prognose für weitere Zinssenkungen eher gedämpft, was aber fast spurlos am Markt vorbei gegangen ist.

Der Gesamt-Markt bleibt im Aufwärtstrend.

### Bedingungs-Order für die Index-Strategien:

TakeProfit bei einem SPX-Kurs von: 5.627 (fix)

StopLoss bei einem SPX-Kurs von: 5.178 (Notstopp, wird täglich und ausschließlich nach oben nachgezogen)

Barchart Opinions show traders what a variety of popular trading systems are suggesting in terms of going long or short the market. The Opinions takes up to 5 years' worth of historical data and runs these prices through thirteen different technical indicators. After each calculation, the program assigns a buy, sell or hold value for each study, depending on where the price lies in reference to the common interpretation of the study.

Barchart Opinions are not a recommendation to buy or sell a security. Your decision whether or not to make a purchase should be based on your own due diligence and not on any representation we make to you.
